

During the 6 month period of the IT: Systems Support learnership programme at The Digital Academy **Simon** and his team created a mobile application called **Jobberg**.

Simon's main responsibilities on the project were working on the Frontend, the databases, and the project documentation using Angular, Bootstrap, PostgreSQL, and other agile dev tools

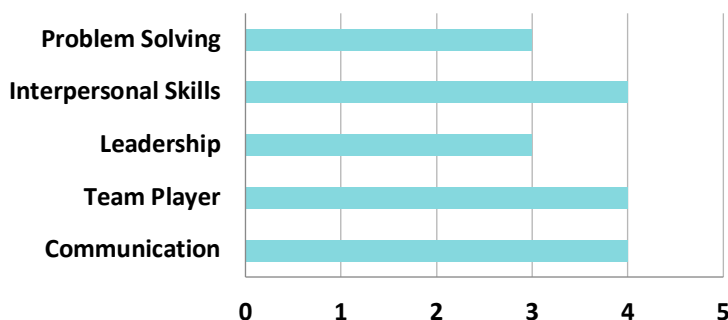

I would have no hesitation in recommending Simon as a Junior Software Developer. He is a strong willed individual and never afraid of asking the hard questions. He is always willing to push his team further, and to assist them with any task.

SOFT SKILLS

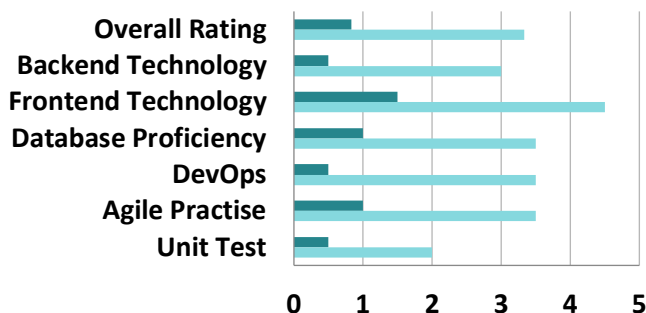

Simon's most improved competency:

Team Player

The skill to venture on with strong resolve and persistence, committed to getting the job done and works well within a team.

TECHNICAL SKILLS

■ Initial Assessment ■ Final Assessment

Primary Skills

Angular 2+
Bootstrap
MongoDB

Secondary Skills

GIT
PostgreSQL
NodeJS

Dylan Knevitt
(Technical Manager)

Melisha Moodley
(Programme Manager)

Gary Bannatyne
(MD & Co-founder)

JobBerg

Problem Statement

There is a disconnect between company culture and the goals that they wish to attain. When employees are misaligned with corporate culture, they lack a feeling of belonging that can severely impact their performance and lead to disengagement or employee turnover.

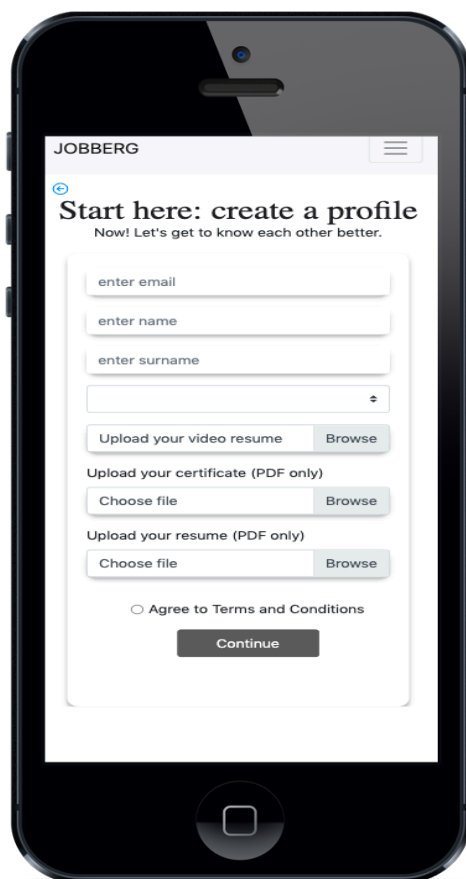

Solution

Providing a platform whereby recruiters focus on culture-fit before technical skills when head-hunting potential candidates. As well as allow candidates to showcase themselves beyond technical skills, ensuring that they are the perfect fit for the workplace culture.

Landing Page

Once a User opens the application they are immediately welcomed by the Home Page of JobBerg.

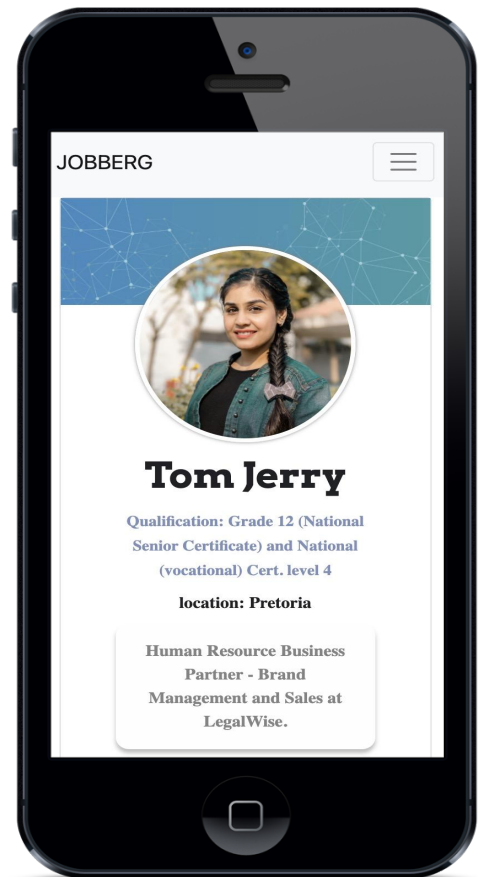

Sign-up

This is the page where candidates or job seekers register their accounts. Candidates must register their names, email and highest qualifications. They are also required to upload their highest qualification, resume and a short video resume.

Candidate Profile

On this page a candidate can view and upload their profiles. The page is accessible only for logged in candidates.

Chats

JobBerg has a chat function whereby Candidates and Employers are able to connect and request for information.

Admin dashboard

When the admins logs in, they land on this page. Here, admins can see all candidates and recruiters registered on the system. They can also add, view, delete and update all users on this page.
